This application is in condition for allowance except for the following formal matters:

Objected Informalities

The disclosure is objected to because of the following informalities:

In The Claims

Claim 11, line 14, after "image" should be inserted -- . --.

Appropriate correction is required.

Objected Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the point source, a sample, a far field imager, the near-field microscopy being movable with respect to a surface of the sample, means for recording near-field data, the borders of the sample, means for obtaining far-field optical image data, means for recording the far-field optical image data, means for incorporating the far-field and the near-field optical data in deconvolution algorithms, and a deconvolved super-resolution image as recited in claim 11; the channels as recited in claim 12; a lens as recited in claim 14; an atomic force microscope for producing atomic force topography information as recited in claim 17, scanning the sample with the beam having subwavelength resolution to define optical contrast points on the sample as recited in claim 18; a closed loop as recited in claim 22; a scanned optical probe as recited in claim 23; scanned probe imaging combined with atomic force imaging to provide two near-field images as recited in claim 24; and

data sets for deconvolving the optical images as recited in claim 25 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Claims 11-25 are allowed.

Reasons for indicating allowable subject matter

The prior art fails to disclose a method for deconvolving far-field optical images, which includes means for incorporating far-field and near-field optical data in deconvolution algorithms using the data from the near-field imaging for added precision of the far-field imaging or as a constraint with the deconvolition algorithms to produce a deconvoved super-resolution image as recited in claim 11.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Schotland et al. disclose a system and method for scanning near-field optical tomography.
